Job Application for Software Engineer

Dear Mr./Ms./Dr. LastName,

Profile

JVM developer with 4 years of Clojure and 10 years of Java experience. My most recent role has been developing MixRadio's RESTful microservices in Clojure on AWS, serving millions of users worldwide. I also have a lot of experience in Big data processing on EMR and have a solid background in test automation. Looking for a modern agile working environment with challenging projects and an opportunity to further my skills.

Why Google?

Why Me?

Sincerely,

Bill Hedworth
