Job Application for Software Engineer

Dear Mr./Ms./Dr. LastName,

Profile

JVM developer with 4 years of Clojure and 10 years of Java experience. My most recent role has was developing MixRadio's RESTful core microservices in Clojure on AWS, serving personalised music to millions of users worldwide. I have a lot of experience in Big data processing on EMR and have a solid background in test automation. Looking for a modern agile working environment with challenging projects and an opportunity to further my skills.

Why Google?

Why Me?

Sincerely,

Bill Hedworth
